

The 5.6k results are incomplete because the electronic timer failed and lost all the timings. The finishing order is known and the 10k times so the 5.6k finish order (minus 7 minutes to account for the later start) has been slotted in against the 10k finishing order for which the time is known. Unfortunately the first 20 5.6k runners came in faster than the first 10k runner so the times cannot be compared. Many apologies for this situation but hope some result is better than none.
